

## THE THREAT TO THE WORLD'S CLIMATE POSED BY PLASTIC

Projected share of CO<sub>2</sub> emissions from global plastic production, maximum budget to meet **1.5 degree warming target\*** by 2050

\* In 2015, the international community agreed to limit global warming to well below 2 degrees Celsius and to pursue 1.5 degrees Celsius compared with the pre-industrial times.

\*\* CO<sub>2</sub> equivalents: unit of measurement for standardizing the climate impact of different greenhouse gases.
